 - (b) What did Newton invent as a young child?
 - (c) In what kind of things was Newton interested as a boy?
 - (d) When did Newton become famous?
 - (e) How did Newton influence other scientists?

Newton was born in 1642 at Wools Thorpe in England. His father, a farmer, had died before Newton was born. Newton's mother was an intelligent lady. Newton had great affection and regard for his mother. As a boy, he was greatly interested in scientific experiments. He loved to play with mechanical toys and loved to make and fly kites. He invented a small windmill in his childhood. He often watched the stars and made a number of sundials. Immediately after joining college, Newton began to work on the problems that made him so famous. He made many discoveries and inventions. He was a great scholar and genius. Many scientists were inspired by him.
