

April 2019

Time – Three hours

(Maximum Marks: 75)

(Sketch 'N' to accompany)

- (N.B: (1) Answer all questions under PART – A and PART – B in the drawing sheet supplied.  
 (2) The sketches under PART – A should be drawn using pencil and drawing instruments, not necessarily to scale.  
 (3) Any data, not given may be assumed suitably and should be indicated in the drawing.)

**PART – A**

(15 marks)

- I Answer the following: 2 x 3 = 6
1. What is the necessity for approval of plans from local body?
  2. Write notes on landscape architecture.
- II Draw the Sectional plan & Elevation of fully paneled door to the 1 x 9 = 9 following specifications.
- |                  |              |
|------------------|--------------|
| Number of leafs  | : 1          |
| Size of door     | : 900 x 2100 |
| Size of frame    | : 100 x 80   |
| Size of shutters | : 75 x 40    |
| Panel thickness  | : 25         |

**PART – B**

(60 marks)

- III The sketch 'N' shows the line plan of a house with R.C.C. roof. The dimensions noted therein indicate the clear dimensions between the walls inside.
- Draw to a suitable scale the following views.
- |                                |            |
|--------------------------------|------------|
| (i) Plan of the building       | (20 Marks) |
| (ii) Sectional elevation on AB | (25 Marks) |
| (iii) Front elevation          | (15 Marks) |
1. **Foundation:** The foundation for all main walls will be cement concrete 1:5:10 mixes, 1000 wide and 300 thick laid at 1200 below ground level. The first masonry footing will be in Random Rubble masonry in cement mortar 1:5, the size being 800 x 450 and the second masonry footing will be in Random Rubble masonry in cement mortar 1:5, the size being 600 x 450 for all main walls.  
 The foundation for veranda walls will be cement concrete 1:4:8 mixes, 600 wide and 150 thick laid at 600 below ground level. The masonry footing will be in Random Rubble masonry in cement mortar 1:5, the size being 450 x 450.
  2. **Basement:** The basement will be in Random Rubble masonry cement mortar 1:6, 450 wide and 600 high above ground level for all main walls and is filled with clean sand to a depth of 450. A damp proof course in cement mortar 1:3, 20 thick will be provided for all walls at basement level.

[Turn over ...]

3. Super Structures: All walls will be in brick work in cement mortar 1:5, using first class bricks, 200 thick. The height of main walls will be 3000 above floor level. The partition walls in between bath & toilet will be 100 thick in brickwork in cement mortar 1:5 using country bricks. All the walls including basement will be plastered smooth with cement mortar 1:4 externally and 1:6 internally for 12.5 thick. Parapet walls 200 thick and 600 height will be provided all-round.

4. Roofing: The roofing will be of R.C.C. 1:1.5:3 mix, 100 thick flat slabs over the rooms. A weathering course, 75 thick consists of two course of flat tiles set in the cement mortar 1:3 mixed with crude oil will be provided over the slab.

5. Joineries: Doors, Windows & Ventilators etc.,

- D1- Panelled door : 1200 x 2100
- D2- Panelled door : 1000 x 2100
- D3- Panelled door : 900 x 2100
- D4- Panelled door : 750 x 2100
- O - Opening : 1000 x 2100

- W1- Panelled window : 1500 x 1200
- W2- Panelled window : 1200 x 1200

V - Ventilator window : 900 x 450

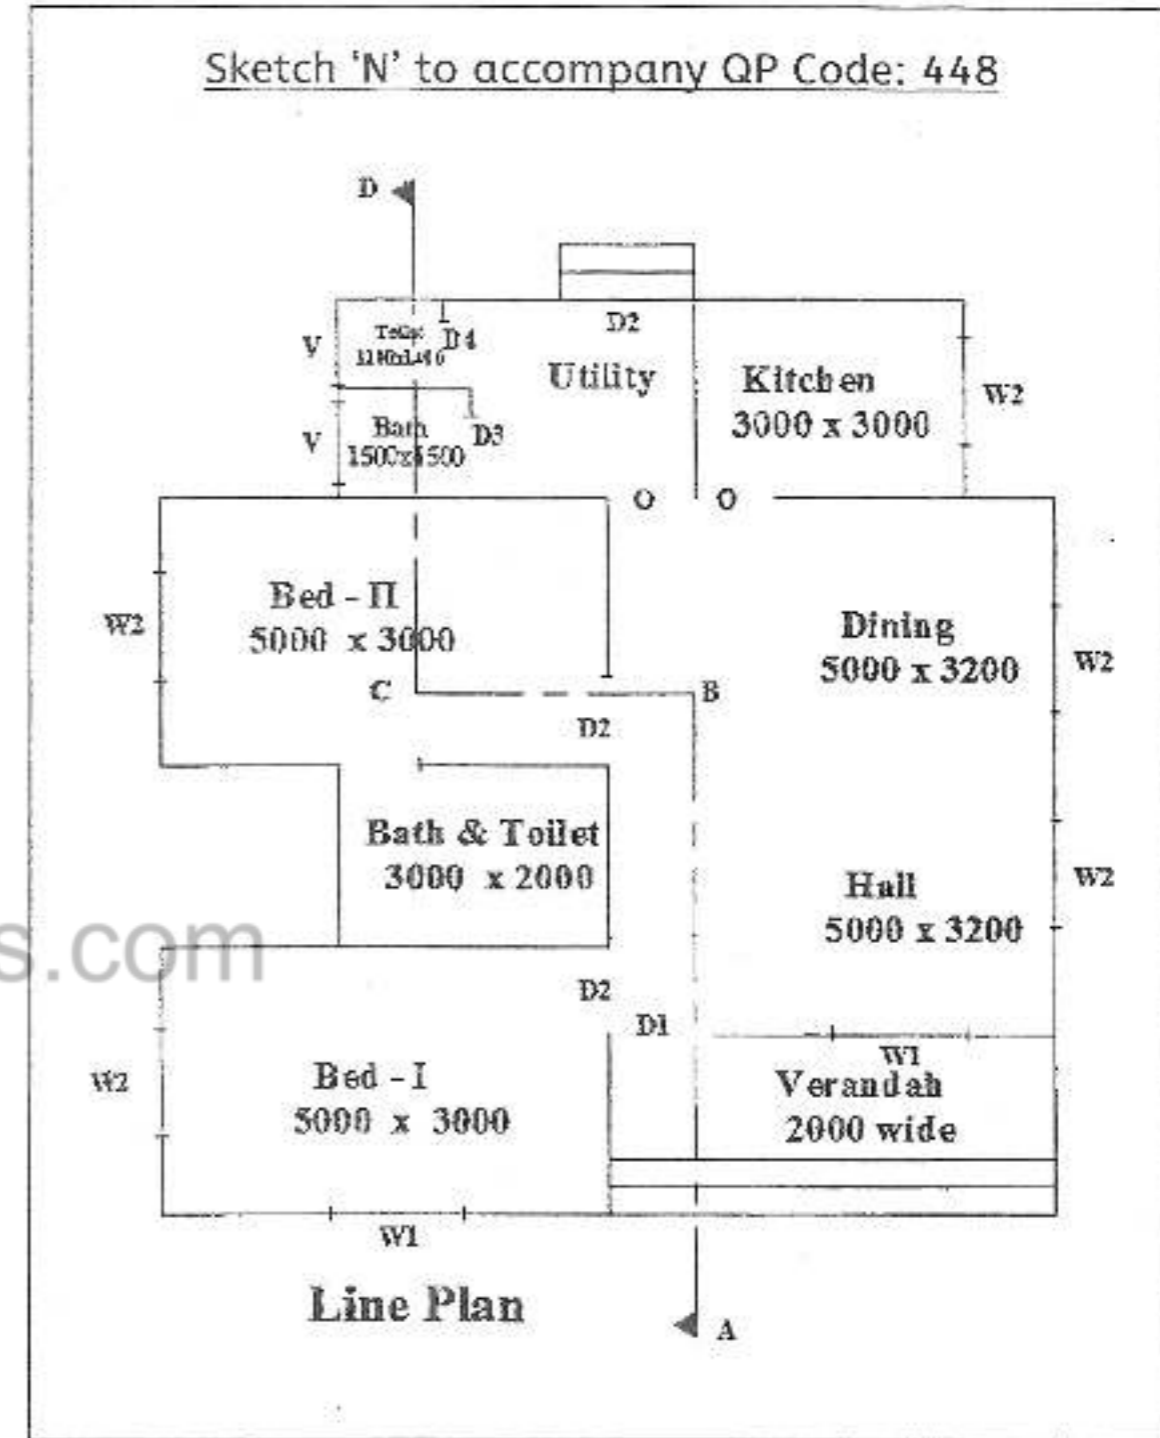

6. Lintel: All internal wall openings will be provided with R.C.C lintel, 1:1.5:3 mix, 150 thick and all external wall openings will be provided with R.C.C lintel-cum sunshade, 1:1.5:3 mix, projection being 450 wide and 80 thick at support and 50 thick at free end.

7. Flooring: The flooring will be in cement concrete 1:4:8, 100 thick and finished with vitrified tiles of 20 thick over cement mortar 1:3 bed of 30 thick for all the portions.

8. Steps: Steps will be in brickwork in cement mortar 1:5 laid on 800 x 150 cement concrete 1:4:8 footing. rise 150, tread 300.

Assume any other data if necessary and indicate the same in the drawing clearly and also assume all data in mm
